None of the topics were entirely new to me. I did all of them in CS113 however I used some way more than others. I havent used Switch, or do while much.

Sub Task #3: What topics do you still not feel confident about? If confident, explain why.

≡ Task Response Prompt

At least a few reasonable sentences.

Response:

I want to get very comfortable sorting through 2 dimensional arrays and manipulating them in different ways and casting. I did it a lot in CS113 but it was the most difficult along side recursion. Those topics need a lot of logic and it always took me a while to do them because I needed time to work it out.
